

Medicaid Provider LineFinder & Below the Line **FAQ**

1. What is LineFinder?

LineFinder is an online tool to assist providers in determining what is covered by the Oregon Health Plan (OHP). OHP generally updates the Line quarterly.

2. Where can I locate the LineFinder tool?

LineFinder can be found online at Intouch.PacificSource.com/LineFinder/.

3. What are some terms I should be familiar with when using LineFinder?

- **Above the Line** (covered diagnosis) – These are diagnoses that fall within the Line ranking of **1 through 469** as of January 1, 2018. Conditions that fall within this ranking are considered payable services by OHP. Payment is subject to member eligibility, medical necessity, and preapproval (if applicable) at the time services are rendered.
- **Below the Line** (noncovered diagnosis) – These are diagnoses that fall within the Line ranking of **470 through 660** as of January 1, 2018. Conditions that fall within this ranking are **not** covered by OHP.
- **Nonranking** – These are diagnoses that retrieve no message/results. These conditions (usually symptom codes) are not covered by OHP without a more specific diagnosis code.
- **Lab and Diagnostic Services**** will usually not rank. They are covered when ordered to **“determine/confirm**”** a diagnosis.
** If the member has a diagnostic procedure performed for a **confirmed** noncovered benefit, the service will be denied.*
- **Comorbidity** – A medical circumstance where a noncovered benefit would be considered by the medical management team for coverage.

4. Above the Line diagnosis example:

Dx: K83.0 This diagnosis falls on Line 55 which is Above the Line and therefore is a covered diagnosis (funded) by OHP.

- Click on the **+** symbol to the left of the line number. This will expand the details showing which CPT codes will pair with the entered diagnosis for OHP coverage. (See image on next page)

5. Below the Line diagnosis example:

Dx: K59.00 This diagnosis falls on Line 526 which is Below the Line and therefore **not** a covered diagnosis (funded) by OHP. If a diagnosis falls below the line, it will not pair with any CPT code.

These may be considered as an exception request, but should not be used routinely. If requesting as an exception, rationale will be needed to determine medical necessity coverage.

 526		DISORDERS OF FUNCTION OF STOMACH AND OTHER FUNCTIONAL DIGESTIVE DISORDERS (See Guideline Notes 64,65,129)	Medical and surgical therapy

6. What happens if a diagnosis falls Above and Below the Line?

Dx: L40.9

Some diagnosis codes will show both Above and Below the Line (see image below). In these circumstances, a nurse will review and determine which Line the diagnosis should fall on. Chart notes will be required to make this determination.

Example: If determined clinically significant, it would be Above the Line (346 and 401) and covered (funded) by OHP. If determined **not** clinically significant, it would fall Below the Line (527), therefore not covered (funded) by OHP.

Filter Results:

Line Number	Funded	Condition	Treatment
 424		SEVERE INFLAMMATORY SKIN DISEASE (See Coding Specification Below) (See Guideline Note 21)	Medical therapy
 539		MILD PSORIASIS; DERMATOPHYTOSIS: SCALP, HAND, BODY (See Guideline Notes 21,64,65)	MEDICAL THERAPY

7. How to use the Code Pairing functionality of LineFinder.

You can determine if service is a covered benefit by entering in the Diagnosis code **and** the CPT code. In the example below, the diagnosis code **E10.10** and procedure (CPT) code **92014** pair and falls on Line 8. This is Above the Line and therefore a covered benefit by OHP.

Please note: The plan may require a preapproval for the service. Please refer to the preapproval grid for requirements.

8. What happens if my search returns no results?

If you enter a diagnosis ([ICD-10]) code and procedure (CPT) code and receive no search results, verify the codes you are entering are valid. Once confirmed, you can assume the codes are **nonranking**.

Nonspecific ICD-10 (symptoms, etc.) codes will not rank and are considered **not** a covered condition by OHP.

Lab and Diagnostic Services usually will not rank. Please verify CPT codes on the [authorization grid](#).

Diagnostic and lab services also do not rank. Diagnostic services may be covered to determine a diagnosis, but may require an approval, such as an MRI of the spine. However, if the diagnosis and treatment have already been determined, the diagnostic request would **not** be a covered benefit by OHP.

Please contact a Provider Service Representative with questions related to the LineFinder tool.

9. What you need to know about Below the Line diagnoses:

- BTL is a noncovered diagnosis; the Line applies to all providers for all Medicaid services.
- The Line will not apply to laboratory or x-ray services. These services are diagnostic in nature. Please note that some laboratory and x-ray services are excluded by OHP (and were never covered, regardless of Line placement).
- ER and urgent care visits will be covered. The existing workflow will remain in place for inpatient stays, since those services require prior authorization.
- Our system will consider up to five diagnoses on any claim to allow for comorbidities. If any of the first five diagnoses are Above the Line, the claim will pay pursuant to the applicable contract arrangement. (The claims system will continue to accept more than five diagnoses per claim; this is particularly important for quality reporting purposes.)
- If none of the first five diagnoses are Above the Line, the claim will be evaluated as described below.
- PacificSource will use the OHA-determined Line and the OHA Diagnostic Workup File (DWF) to determine coverage. (The DWF contains a number of diagnosis codes that pertain to symptoms. PacificSource is using the DWF to allow providers to make a diagnosis.)
- The process described above will also be applied to claims where Medicaid is the secondary payer.

10. What will happen to primary care claims with no Above the Line diagnoses? How will specialty claims be affected?

- Primary care claims will be allowed one diagnostic office visit every 30 days for the same diagnosis code. This means that primary care clinics will be paid for the first diagnostic visit for a particular member. Any additional claims within 30 days showing the same diagnosis will be denied.
- If all of the first five diagnoses are Below the Line and no diagnoses appear in the DWF, the claim will be denied.
- The volume of denied specialty claims will not be affected by this change. As noted above, referral and prior authorization requirements remain the same. If no referral or prior authorization is in place as currently required, the claim will be denied as Below the Line.

11. How can we set up a meeting with our Medical Director and PacificSource?

To set up a meeting, please contact **Alison Little, MD**, at alison.little@pacificsource.com.
