

## LineFinder Frequently Asked Questions

### 1. What is LineFinder?

LineFinder is an online tool to assist providers in determining what is covered by the Oregon Health Plan (OHP). OHP generally updates the Line quarterly.

### 2. Where can I locate the LineFinder tool?

LineFinder can be found online at [Intouch.PacificSource.com/LineFinder/](https://Intouch.PacificSource.com/LineFinder/).

### 3. What are some terms I should be familiar with when using LineFinder?

- **Above the Line** (covered diagnosis) – These are diagnoses which fall within the Line ranking of **1 through 469** as of January 1, 2018. Conditions that fall within this ranking are considered payable services by OHP. Payment is subject to member eligibility, medical necessity, and preapproval (if applicable) at the time services are rendered.
- **Below the Line** (non-covered diagnosis) – These are diagnoses which fall within the Line ranking of **470 through 660** as of January 1, 2018. Conditions that fall within this ranking are not covered by OHP.
- **Non-ranking** – These are diagnoses which retrieve no message/results. These conditions (usually symptom codes) are not covered by OHP without a more specific diagnosis code.
- **Lab and Diagnostic Services\*\*** will usually not rank. They are covered when ordered to “**determine/confirm\***” a diagnosis.  
*\* If the member has a diagnostic procedure performed for a CONFIRMED non-covered benefit the service will be denied.*
- **Co-morbidity** – A medical circumstance where a non-covered benefit would be considered by the medical management team for coverage.

### 4. Above the Line diagnosis example:

**Dx: K83.0** This diagnosis falls on Line 55 which is Above the Line and therefore is a covered diagnosis (funded) by OHP.

- Click on the  symbol to the left of the line number. This will expand the details showing which CPT codes will pair with the entered diagnosis for OHP coverage. (see image on next page)

## 5. Below the Line diagnosis example:

**Dx: K59.00** This diagnosis falls on Line 526 which is Below the Line and therefore **not** a covered diagnosis (funded) by OHP. If a diagnosis falls below the line, it will not pair with any CPT code.

These may be considered as an exception request but should not be used routinely. If requesting as an exception, rationale will be needed to determine medical necessity coverage.

|  526 |  | DISORDERS OF FUNCTION OF STOMACH AND OTHER FUNCTIONAL DIGESTIVE DISORDERS (See Guideline Notes 64,65,129) | Medical and surgical therapy |

## 6. What happens if a diagnosis falls Above and Below the Line?

### Dx: L40.9

Some diagnosis codes will show both Above and Below the Line (see image below). In these circumstances, a Nurse will review and determine which Line the diagnosis should fall on. Chart notes will be required to make this determination.

Example: If determined clinically significant, it would be Above the Line (346 and 401) and covered (funded) by OHP. If determined NOT clinically significant, it would fall Below the Line (527), therefore not covered (funded) by OHP.

|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-----------------|
|  424 |  | SEVERE INFLAMMATORY SKIN DISEASE (See Coding Specification Below) (See Guideline Note 21) | Medical therapy |
|  539 |  | MILD PSORIASIS; DERMATOPHYTOSIS: SCALP, HAND, BODY (See Guideline Notes 21,64,65)         | MEDICAL THERAPY |

## 7. How to use the Code Pairing functionality of LineFinder.

You can determine if service is a covered benefit by entering in the Diagnosis code and the CPT code. In the example below, the diagnosis code **E10.10** and procedure (CPT) code **92014** pair and falls on Line 8. This is Above the Line and therefore a covered benefit by OHP.

Please note: The plan may require a preapproval for the service. Please refer to the preapproval grid for requirements.

## 8. What happens if my search returns no results?

If you enter a diagnosis ([ICD-10]) code and procedure (CPT) code and receive no search results, verify the codes you are entering are valid. Once confirmed, you can assume the codes are **non-ranking**.

Non-specific ICD-10 (symptoms, etc.) codes will not rank and are considered not a covered condition by OHP.

### Search Results

**Current** Line is at: **469** as of 4/1/2018

Your search criteria did not match any lines.

Lab and Diagnostic Services usually will not rank. Please verify CPT codes on the [authorization grid](#).

Diagnostic and lab services also do not rank. Diagnostic services may be covered to determine a diagnosis, but may require an approval, such as a MRI of the spine. However, if the diagnosis and treatment have already been determined, the diagnostic request would not be a covered benefit by OHP.
